

## Overall Goal of this Project:

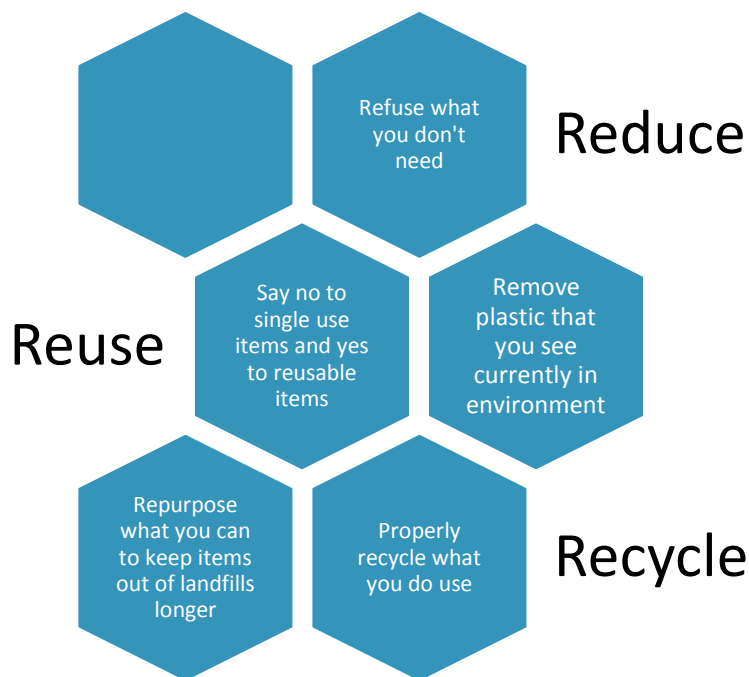

Eliminate the consumption of single-use plastic at the CHC

### How will we get there?

Change your mindset. Start thinking more about your consumption and reconsider some choices to see what alternatives are available.

Start with small changes, eventually they become habit. Make a plan. Pick a couple of things that you can change as an individual and as a department and focus on these changes first.

### *Small actions can produce big outcomes*

### Action Items:

No longer purchase single use cups, utensils, plates, straws, stir sticks or plastic bags

Increase number of recycling & green bins available to staff & clients

Encourage use of reusable water bottles & coffee mugs

Increase number of water stations by adding 2 new water coolers

Introduce incentive programs
